## CAKE

### Company Description:

CAKE, a Mad Mobile company, is a fully integrated cloud-based Point of Sale (POS) system specifically built for restaurants. We offer solutions for the entire dining experience. From mobile marketing and waitlist management to point of sale and payment processing, we help our clients grow their business.

### Value:

CAKE's easy-to-use Point of Sale system helps restaurants speed up orders, build customer loyalty, and optimize revenue streams, all while improving our client's bottom line. Customized workflows, on-the-fly menu adjustments, and order entries on one simple screen help accelerate speed of service and keep guests happy. Our advanced mobile technology allows restaurants more ways to connect with their customers and streamline their operations.

### Advantage:

CAKE is consistently rated the easiest to learn and easiest to use Point of Sale on the market. We outrank competitors in ease of use, quality of support, and value for money. Compared to other Point of Sale systems, our hardware was designed specifically for restaurants to serve customers faster and more efficiently.

### Product Offering:

We offer solutions built for all restaurant types, small or large. Clients can manage their entire restaurant in one place with integrated online ordering, complete with curbside management and contactless delivery options, waitlist and reservations, contactless payments, and more.

Sysco  
Exclusive
